FED4FED: Statistical Fairness Evaluation Report

Privacy-Preserving Verification for Federated Learning Models

FAIRNESS VERDICT: FAIR (Performance Homogeneous)

Under the Conservative Joint Policy (Disparity detected if either Alg 1 or Alg 2 rejects H0), the global federated model demonstrates statistically fair performance. Neither test found significant evidence to reject the null hypothesis of equal performance at alpha = 0.05. Alg 1 p-value: 0.2410, Alg 2 p-value: 0.2476.
